Professional Services

Crisp Digital offer a high level of professional services for Enfocus users including the configuration of Action Lists for use in PitStop Pro and PitStop Server and the development of complex workflows for use in FullSwitch and PowerSwitch which are all intricately configured specifically for your clients way of working. Complex workflows can take several days to develop but can automate a huge array of tasks that will free up operator time and minimize errors. Good examples of this are the ability to automatically collect files from FTP and Email accounts, convert these files into PDF, preflight these PDFs, convert fonts to outlines (using Adobe Illustrator), rotate and colate files, set trim and bleed boxes ready for proofing and imposing, automatically impose (using third party automated imposition software such as inpO2 by Dynagram), archive files into client/job directories, link directly with third party workflows, and much, MUCH more.

* Available for Mac or Windows - Please select either MAC or WIN as appropriate.

Crisp Digital are an official Nustream Partner and Integrator.

Proofstream

Proofstream provides a range of Web based collaborative proofing and workflow tools designed to handle each step of the proofing and file handling process. Proofstream is designed to meet the highest Design and Pre Press production demands by automating the manual tasks normally associated with getting ideas to print, from file submission and optimising, to final delivery, be it internally or the other side of the world: Proofstream Delivers.

ProofStream can run as a standalone application or in conjunction with all leading Workflow manufactures providing Rendered data to the end user via a browser (the file you view is the file that is used to print). Supported Workflow systems include: Agfa ApogeeX, Screen Truflow, Harlequin based RIP's, CGS Oris Normaliser, ArtQuest, Barco/Esko Graphics and Fuji XMF.

(Price includes 1 year Support & Upgrade Agreement)

Order Code	Product Description	Price Ex VAT
NSPSEVAL	Proofstream 30 day Evaluation	FREE
NSPSLI	Proofstream Lite - Web based collaborative approval software (10 concurrent users)	£ 2,295.00

Crisp Digital are the official UK & Ireland distributor for the complete TGLC product range.

PerfX Device Link Series

PerfX Device Link is the perfect tool to create ICC DeviceLink profiles. This type of ICC profile, is commonly used to reparate CMYK colours, in order to optimise the colour reproduction based on the type of printing process, paper and ink used for printing. PerfX Device Link also allows you to create ICC DeviceLink profiles for RGB to CMYK conversions, in order to reproduce RGB neutral greys using the black ink only! The Pro version allows for the generation of DeviceLink Profiles with built in Grey Component Replacement (GCR). GCR produces up to 30% ink saving, better print quality with more vivid colours, faster make ready and turn around on press, more consistent print results, quality improvements, and equipment optimisation. DeviceLink Profiles can be used with leading RIP and Workflow products including the Harlequin RIP (with ColorPro), the Enfocus PitStop Suite and similar products.

Order Code	Product Description	Price Ex VAT
PERFXDL-MAC/WIN*	PerfX Device Link	£ 2,495.00
PERFXDLPRO-MAC/WIN*	PerfX Device Link Pro - As above with GCR for ink saving	£ 3,995.00

PerfX DeviceLink Profile Generation Service

Many printers require just one or two DeviceLink Profiles which they can then apply to their PDF documents (using Enfocus PitStop Pro, Server, OEM or similar products) or final output at the RIPping stage. We can now provide an ICC DeviceLink Profile, with GCR compensation, based on your preferred ICC/ICM file. You provide an existing profile, we generate an ICC DeviceLink Profile with built in GCR compensation, and you implement it in your workflow. **You get instant ink saving without the huge investment costs!**

Order Code	Product Description	Price Ex VAT
DLPROFILE	ICC DeviceLink Profile with GCR	£ 995.00
DLPROFILE-ADD	Additional ICC DeviceLink Profiles with GCR (each)	£ 795.00

PerfX Colour Management Series

Colour Management and ICC Profile generation

Training & Support

Training

Crisp Digital training is carried out by a fully qualified operators, with a working knowledge of applications that affect the prepress environment. To achieve maximum benefit, training is carried out on site. Trainees should be taken out of the working environment as much as possible and therefore the machine used for the training should be available for the duration. We encourage as much 'hands-on' learning from the trainees as possible, as it is felt this is the most effective way of learning the software. There is a basic path of training taken, outlined depending on which product is being trained.

Please see individual product listings for training bundles.

Training
