

The perfect solution for automatic color conversion

- You have many TIFF-IT CT file to convert from CMYK to CMYK. You want to automate such type of color conversions.

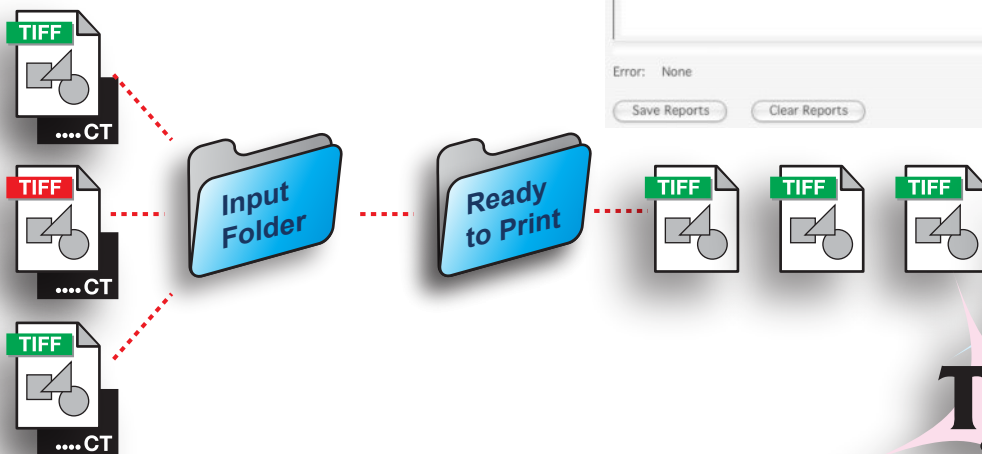

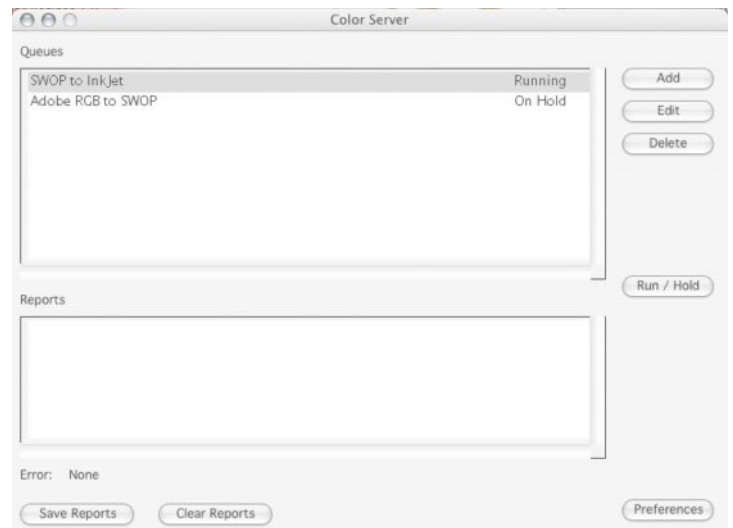

YOU WANT A SOLUTION FOR ALL OF THE ABOVE?

PerfX Color Server TIFF_IT™ is your solution!

Key features:

- Automates the color conversion process through predefined hot folders that will apply automatically any source and destination profiles and save the converted files to the desired directory.
- Many processing queues can be defined and used at the same time.
- Will convert only the CT files and leave the others FP and LW unchanged.

PerfX Color Server TIFF_IT™
